

The 47 candidates trade strengths across axes

Alphabetical order; within-pool favorable percentiles; no composite score or winner.

Retained through G4 (11) Stopped at G4 (14) Stopped at G3 (18) Stopped at G2 (4)

First stop

[†] Existing deep DFT: B₂O₃ and Nd₂O₃ (2/47); G4 is heuristic; mechanisms are roster-relative.

For B₂O₃ the deep-DFT cell and the tabulated onset are different compositions (plain vs Cl-rich chain variant); see ox_composition_family in the CSV.
